CAREER OBJECTIVE

Computer Science Engineering graduate with strong foundations in Java, Python, SQL, Object-Oriented Programming, backend development, REST APIs, and database management. Hands-on experience building applications, implementing CRUD operations, debugging software, and validating application workflows. Seeking to contribute to scalable enterprise software development while building expertise in cloud technologies, DevOps, and modern backend engineering..

EDUCATION

- **Bachelor of Engineering - Computer Science Engineering**
Cambridge Institute of Technology, Bengaluru
2022 - 2026
CGPA: 8.5
- **Pre-University Course (PUC)**
Sri Chaitanya PU College, Bengaluru
2020 - 2022 | 76%
- **SSLC**
Sri Chaitanya Techno School, Bengaluru
2020 | 73%

TECHNICAL SKILLS

- **Programming Languages:**
Python, Java, C
- **Core Computer Science:**
Object-Oriented Programming, Data Structures, Algorithms , Exception Handling, File Handling, Debugging
- **Software Development:**
Backend Development, Application Development, REST API Fundamentals, CRUD Operations, Functional Validation, SDLC Fundamentals
- **Database:** SQL, MySQL, Relational Databases, Joins, Aggregations, Data Validation
- **AI/ML & Data:** NumPy, Pandas, OpenCV , Machine Learning Fundamentals, Data Preprocessing, Data Analysis .
- **Professional Skills:** Analytical Problem Solving, Technical Documentation, Communication, Team Collaboration, Requirement Understanding, Attention to Detail

INTERNSHIP

Full Stack Development Intern

VrishankSoft (OPC) PVT LTD | Feb 2026 – May 2026

- Developed web application features using frontend and backend technologies, contributing to application functionality and workflows.
- Used Python and SQL for application logic, database operations, and data handling.
- Implemented input validation and CRUD functionality to maintain data integrity and application reliability.
- Performed debugging and functional validation to identify issues, verify workflows, and improve application reliability.
- Worked with application and database workflows to identify inconsistencies and support effective problem resolution.

CERTIFICATIONS

- The Joy of Computing Using Python - NPTEL
- Python Foundation Certification - Infosys Springboard
- Machine Learning Foundation Certification - Infosys Springboard
- Java Foundation Certification - Infosys Springboard

RESEARCH WORK

- AI powered Image and Video Editing Research Paper -VidStyler

PROJECTS

AI Powered Image and Video Editing

- Developed an interactive Python and Gradio-based AI application for image and video editing.
- Implemented AI-powered features including neural style transfer, object removal, and video processing.
- Used PyTorch, TensorFlow, and OpenCV for AI-based image/video processing and application functionality.
- Validated user inputs, outputs, and feature workflows to ensure consistent and reliable application behavior.
- Identified, reproduced, and debugged runtime and performance issues to improve application reliability.

Energy Consumption and Conservation Analysis

- Analyzed energy consumption data using Python and SQL to identify patterns, inconsistencies, and insights.
- Performed data preprocessing and validation to improve accuracy and data quality.
- Used SQL queries and aggregations to analyze datasets and identify missing values and data-quality issues.
- Generated analytical reports to support data-driven insights and energy conservation opportunities.

Student Expense Tracker

- Developed a web-based expense tracking application with SQL-based backend data management.
- Implemented input validation and database operations to maintain data integrity and reduce inconsistent records.
- Performed functional validation of expense entry, data storage, and application workflows.
- Used SQL queries to verify database records, identify inconsistencies, and improve application reliability.
